EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest time information representative of a singing-starting time point, and singing length information representative of a singing length that is earlier in time than the singing-starting time point. (See Specification, e.g. Figures 9, 20, and 27A to 27C) Applicants' Specification, Page 2, suggests an advantage of making more natural singing voices by setting the singing-starting time point of a consonant (first phoneme) to be set earlier than the actual singing-starting time point.

Ohta, Column 11, Lines 7 to 33: Figure 3, discloses a conventional embodiment of the prior art, where it is known to assign phonetic information representative of phonetic units, time information representative of singing-starting time points, and singing length information representative of singing length, but does not generate phonetic unit transition time lengths or provide for timing earlier than the singing-starting time point. *Ohta* discloses several ways to synchronize a sound instrument and a singing voice by delaying starting times, compressing, or cutting off portions of phonemes -- Column 15, Line 4 to Column 16, Line 52: Figures 13A to 14C -- but does not provide for a singing length that is earlier in time than the singing-starting time.

Thus, independent claims 1, 3, 11, and 13 are allowable because the prior art of record does not disclose or suggest making a singing-starting time point earlier in time for a first phoneme so as to make more natural singing voices.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
